**LISTING OF CLAIMS:**

1-19 (canceled).

20. (original): A method of manufacturing a film case including a casing having an exposure opening and a film discharge slot, for storing a plurality of sheet-like films therein, a film cover detachably mounted in said exposure opening for holding the sheet-like films in a light-shielded fashion in said casing, a lid closing said casing with the sheet-like films stored therein, and a presser mounted on said lid for pressing the sheet-like films stored in said casing toward said exposure opening, comprising the steps of:

feeding said casing and said lid on a main assembly line;

supplying said film cover to said main assembly line and assembling the film cover in said casing; and

supplying said presser to said main assembly line and assembling the presser on said lid.
